CDW SERVICEWORKS COMPUTE

ACTIVATE cloud compute services.

When moving your apps and data to the cloud, choose a platform you can mould to your business—with a partner who understands your needs. CDW ServiceWorks is underpinned by an established managed platform and powered by world-class data centres located in the UK.

What is CDW ServiceWorks Compute?

ServiceWorks Compute gives you all the processing power you need to run your business-critical applications, without the need to own or manage your own data centre. Delivered from CDW's UK-based data centres, our managed platform provides a flexible, scalable and reliable compute service for demanding business tasks.

The infrastructure is proactively monitored 24/7 by our dedicated Service Operations Centre (SOC) located in Peterborough. It is continually subject to internal and independent external testing, to optimise performance and repel threats from an ever-changing security landscape.

CDW ServiceWorks Compute Services gives you the edge

Built on enterprise-class technology for business-critical workloads and delivered from state-of-the-art UK-based data centres, CDW ServiceWorks Compute:

· Removes the challenges of managing in-house infrastructure
· Accelerates time-to-value of standing up new services
· Mitigates the risk of launching new services

We invest heavily in building and maintaining our platform with best-of-breed technology.

Our data centres are configured for the highest levels of resilience—up to 99.999% uptime is guaranteed.

We maintain the highest levels of physical and logical security.

We reduce complexity by providing three levels of service based on your needs— Basic, Essential and Premium.

Why CDW?

As a trusted IT solutions provider, CDW delivers service-driven solutions to more than 170 countries worldwide. With international hubs in key regions, we can help you consolidate your IT requirements across the globe.

World-class data centres, world-class technology

CDW invests in the best data centres that configured to the highest standards. Our Redhill and Northampton data centres exceed UTI Tier 3+ standards. Take advantage of right-sized technology without being impeded by prohibitive capital costs or lack of specialised skills.

Accelerate time-to-value

Stand up services quickly by avoiding long procurement cycles and technical dependencies. Similarly, avoid the burden of acquiring and maintaining infrastructure, especially if requirements are short term or seasonal.

In capable hands

CDW is a Fortune 500 company with a 37-year track record. We hold the highest accreditations, with a stable of leading vendors including VMware, HPE, NetApp and Cisco. We have won numerous awards for our expertise working with these technologies, including VMware EMEA Solutions Provider of the Year, HP EMEA Enterprise Growth Partner of the Year and Cisco UKI Data Centre Partner of the Year. ServiceWorks is truly managed by a team of experts.

CDW brings together the services and technologies that solve your business problems.

CDW **PEOPLE WHO GET IT**

How CDW ServiceWorks Compute works

The ServiceWorks platform is built for business-critical workloads, so practically any service can be moved onto our Compute solution. Use ServiceWorks to extend or enhance your existing on-premises infrastructure, or as a fully outsourced alternative.
Many of our customers trust their entire portfolio of business services to ServiceWorks.

ServiceWorks Compute is a valuable platform for test and development, and for projects which may be short term or whose future is unclear. It's also a great stepping-stone on your IT transformation journey to public cloud, allowing infrastructure to be moved to a cloud-based, flexible commercial model while workloads are modernised and transformed to take full advantage of public cloud.

The infrastructure is proactively monitored 24/7 by our dedicated Service Operations Centre (SOC) located in Peterborough. It is continually subject to internal and independent external testing, to optimise performance and repel threats from an ever-changing security landscape.

Built for simplicity

Predefined virtual machine instance sizes and features make for straightforward sizing and selection of the service best suited to your needs. Workloads can be migrated into ServiceWorks using industry-leading expertise and toolsets, or built new in ServiceWorks. Once on the platform, routine changes such as new workloads can be spun up quickly and to your requirements.

Data protection is built in, and DR capability can be included with your service, including dual centre replication for resilience and compliance.
