

**DON'T JUST  
KEEP UP, GET  
AHEAD OF  
SECURITY  
ATTACKS WITH  
CISCO and CDW**

### Stop Threats Before They Reach Your Network

In the past, desktops and critical business infrastructure were all stored behind the firewall. Today, due to the rise of mobile working, there are more roaming users and corporate-owned devices accessing the internet from outside the corporate network (research shows 82% of users don't use VPN). In addition, more cloud apps, mean that users may not be using the corporate VPN to get work done, and more branch offices are connecting directly to the internet.

#### Introducing Cisco Umbrella

Cisco Umbrella is a cloud security platform that provides the first line of defense against threats on the internet wherever users go. Cisco's global infrastructure handles over 100 billion internet requests a day, which their security engine analyses to learn where attacks are being staged even before the first attack is about to take place.

#### Enterprise-Wide Deployment in Minutes

Cisco Umbrella is the fastest and easiest way to protect all of your users in minutes. There is no hardware to install or software to manually update because it is delivered by the cloud. You can provision all on-network devices in minutes and use your existing Cisco footprint – AnyConnect,

Integrated Services Router (ISR) 4K Series, and Wireless LAN Controller 5520 and 8540 – to quickly provision thousands of network egresses and roaming laptops.

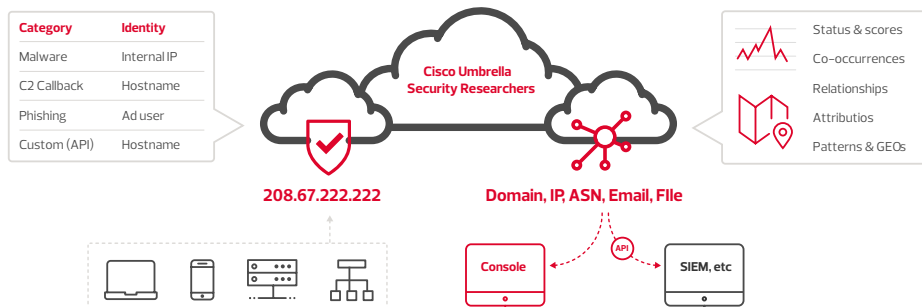

#### CDW Cisco Gold Partner

As a multi-award winning Tier 1 Cisco Gold Partner, CDW is fully equipped to help orchestrate and deliver whole-scale strategic security solutions that meet the needs of every organisation. Our dedicated team of Security experts have the knowledge to work with you in designing the most effective solution to help you manage and mitigate risk. Our exceptional global capabilities and unrivalled reach means that we also have the ability to deploy Cisco solutions and entire architectures on an international scale.

#### Limited Time Offer – Free 14 Day Trial

For a limited time only, Cisco is offering customers the opportunity to take advantage of a 14 day cost-free trial of Umbrella so you can discover the impact it can have in securing your environment. A weekly report will be sent directly to your inbox with a personalised summary of any malicious requests made to enter your network.
