CDW SERVICEWORKS COLOCATION

ACTIVATE colocation services.

Maintaining an expensive facility to host your IT infrastructure ties up capital and personnel. CDW delivers secure, multi-location managed hosting and colocation, allowing customers to expand their data centre footprint flexibly and cost-effectively.

What is CDW ServiceWorks Colocation?

ServiceWorks Colocation is a range of colocation services delivered from UK data centres located in Redhill and Northampton. Interconnectivity and network backhaul between sites, plus an extensive range of on-net network provision, ensure the greatest levels of connectivity and allow for fast and simple migration of technology into our data centres.

All of our data centres are contained in highly secure compounds, manned by 24/7 security personnel. The data centres operate with a minimum of N+1 resiliency, from substation to server cabinet, with backup diesel generators and strict fuel filling contracts to ensure constant uptime, even in the event of national grid failure.

Charging is straightforward and based on the space, power and cooling consumed in the data centre.

Designed for the UK

Cost-effective, risk-free management is critical to the modern data centre. CDW's data centre locations are built to keep your critical operations safe and secure, with maximum efficiency. Our Redhill data centre is ideally located for operations in London and the Southeast, with additional facilities in Northampton.

CDW ServiceWorks Colocation: Benefits

All CDW Data Centres are connected by a resilient backbone network, providing fast, reliable connectivity:

- Share in world-class data centres
- Experience impressive uptime guarantees
- Manage costs with a simple charging model
- Leverage additional capacity and capability through a wider ServiceWorks portfolio
- Gain layers of security with dual authentication and biometric scanning, card key access control and archived CCTV coverage
- Reduce power consumption with BREEAM (EU) standards
- Access 24x7 support from a dedicated team
- Experience extra protection from fire risks:
  - Double interlock pre-action water mist systems installed and overhead and under-floor smoke detection
  - N+1 cooling
  - Computer Room Air Conditioner (CRAC) units

Why CDW?

As a trusted IT solutions provider, CDW delivers service-driven solutions to more than 170 countries worldwide. With international hubs in key regions, we can help you consolidate your IT requirements across the globe.

World-class data centres, world-class technology

CDW has spared no expense in building data centres that can compete with the best in the world. Our Redhill and Northampton centres exceed UTI Tier 3+ standards. Take advantage of right-sized technology without being impeded by prohibitive capital costs or lack of specialised skills.

Integrate with CDW ServiceWorks and 3rd party apps

Connect your data centre with the systems you choose—whether it's CDW-provided DRaaS and BaaS, virtualisation, or a customised ERP.

Security and compliance

You would be hard pressed to match the level of security and integrity that CDW can provide as-a-service—at least in terms of cost-effectiveness. While you retain ownership of the hardware, you can rest assured it is locked down and always on. IT departments will love not having to worry about back-end infrastructure again; server, storage and backups are all part of the service.

CDW brings together the services and technologies that solve your business problems.

CDW PEOPLE WHO GET IT

How CDW ServiceWorks Colocation operates

CDW delivers colocation and managed hosting solutions that deliver the benefits of an on-site facility, with significantly lower cost and management challenges.

- With extensive colocation and connectivity options, we offer a simple transition from internal infrastructure management

- We take a flexible, customer-centric approach to colocation, tailoring the pace of change to fit your roadmap

- Our ServiceWorks network hub enables rapid network integration, with connectivity available from major suppliers

World-class data centres

We have spared no expense in building our data centres and investing in the technology that underpins them. As a result, the solutions we deliver through the ServiceWorks cloud are quite simply the best money can buy.

Intelligent planning

We put care and thought into your colocation service and identify potential pain points and work with you to resolve them. We don't just supply a rack and wish you well.

A home for what you have

There is little restriction on what technology can be colocated in our data centre, although in some instances, we may draw on the expertise of specialist providers should you require a managed service for bespoke infrastructure.

On-net, on budget, on time

Our data centres have a range of connectivity measures and support all industry standard connectivity methods. They also have a variety of on-net network providers including Virgin Media, Level 3, Verizon and Interoute, which mitigate significant capital expenditure to colocate, while shortening time to get the service live.

Beyond just colocation

Augment your service with complementary cloud services from the wider ServiceWorks portfolio including Security, Backup, Disaster Recovery and Compute. We manage your equipment through a combination of extra value services spanning monitoring, management and break/fix maintenance.

Our teams come with decades of industry-leading hosted colocation and managed service experience. Hundreds of companies of all sizes and across every industry trust CDW to help them with their data centres' mission-critical infrastructure choices.
